Academic Program Outcomes Review, 2021-2026

Office of Institutional Research - Ridgeview State University (fictional, all data generated for testing)

What to check in the PDF

1. Merged header cells (colspan and rowspan) in Table 1 line up with the data columns under them.
2. The landscape section turns the page sideways and the wide 18-column table fits without clipping.
3. Pages after the landscape section return to portrait.
4. Heat-map cell colors print (shades of maroon). Badges keep their rounded colored background.
5. The two-column newspaper text flows down column 1, then column 2, and continues correctly onto the next page.
6. SVG charts are sharp (zoom in: lines should not blur) and are not split across pages.
7. The long URL wraps inside its box instead of running off the page.
8. The table nested inside a table cell renders with its own borders.
9. The embedded image (a small generated PNG) appears.

1. Enrollment and completions

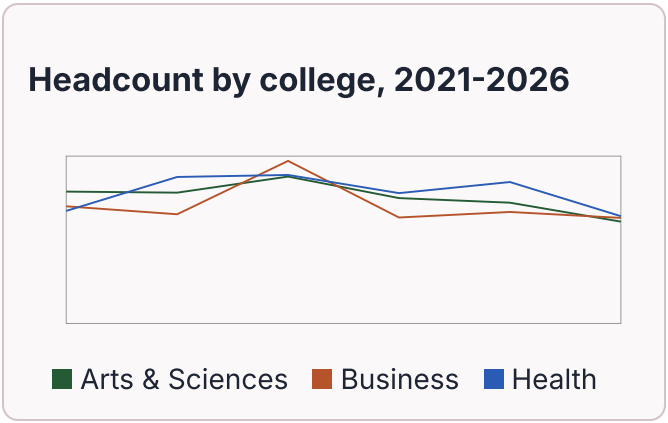

Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization.

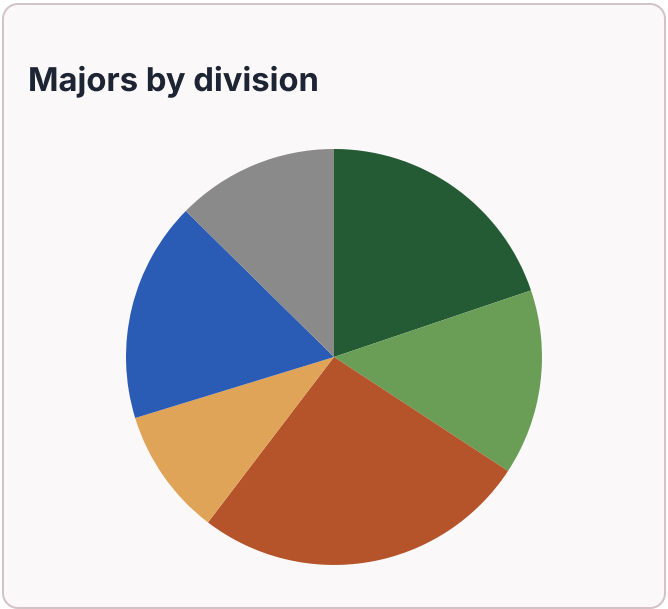

Table 1. Enrollment and completion by program

Program	CIP	Fall enrollment			Completions			6-yr grad rate
		2024	2025	2026	2024	2025	2026	
Accounting	16.8529	166	176	100	38	26	24	63.9%
Biology	11.3035	248	185	451	60	40	82	83.6%

2. Trends

Finding 1. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes

that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization.

Finding 2. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization.

Finding 3. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization.

Finding 4. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization.

Finding 5. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization.

Finding 6. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization.

Finding 7. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization.

Finding 8. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow

each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization.

Finding 9. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization.

Finding 10. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization.

Finding 11. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization.

Finding 12. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization.

Finding 13. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization.

Finding 14. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization. Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and

generated for testing the conversion of HTML into PDF; they describe no real organization.

3. Retention heat map (landscape page)

Percent of first-year students retained to year two, by program and entering cohort. 18 columns.

6. Methodology

Analysts reviewed the figures below against the prior period and the planning assumptions. Variances larger than five percent are flagged and explained in the notes that follow each table. All values are fictional and generated for testing the conversion of HTML into PDF; they describe no real organization.
